Roberts Mountain Shop Management System

Author: Robert Renecker

Project Description

This management system will help a worker at Robert's Mountain Shop better facilitate the renting of various mountain items to a customer. It will keep track of who the customer is, what they have rented and various other attributes that follow along with a rental contract.

Requirements

Mockup #1

User Requiren	nents				
Use case ID	Use Case Name	Primary Actor	Complextity	Priority	
1	Create Account	Generic User	Low	1	
2	Search Available items	Generic User	Low	1	
3	Return an item	Customer	Medium	1	
4	Rent an item	Customer	Medium	1	
5	View current rentals	Employee	Medium	2	
6	Report lost item	Generic User	High	3	
UI Mockups
